

Search

In the store you can search for tire sizes, item numbers or step by step for certain items. In the following manual we show you how:

1. To search for a specific size, use the input field "**Size/Matchcode**". This is the easiest way to find your item. To do so just type your desired size as a number combination in the field. For example, you will find all tires with the size 710 70 R 38 by typing in 7107038.

- 2. Press enter or click on the magnifying glass symbol in the search field to start the search. After that you will receive your search results in a list. Thereafter you will receive a list of results. Here you will see all items we offer in your desired size. Even tubes or entirely assembled wheels.
- 3. To search in a specific segment, please use the filter functions. To do so please click on one of the main filters that are provided in the main navigation for example tires. Enter the size as a number combination. This will provide you with a list of tires in your desired size.
